

Imagine a future without cancer

One revolutionary idea. One promising clinical trial. One new breakthrough. Discovering and developing new drugs and better treatments that save lives and making them accessible to all communities is how Massey is moving toward a future without cancer.

by the numbers

as of December 2020

Massey is headquartered in Richmond, VA, but has a **statewide footprint** with satellite clinics as well as research, education and community outreach and engagement initiatives throughout Virginia.

VCU Massey Cancer Center is designated by the National Cancer Institute (NCI) to **lead and shape** America's cancer research efforts.

Of the 1,500 cancer centers nationwide

ONLY 71

have earned a prestigious designation from the NCI to make discoveries that become life saving treatments.

WE ARE PIONEERS

NCI Centers are the **primary source** of **new discoveries** of cancer's causes, prevention, diagnosis and treatment.

Massey conducts research at every level to save and improve lives.

Massey's research is informed by input from our community and conducted in partnership with our community to best serve the people's needs, with a local focus but global impact.

Massey is **NATIONALLY RECOGNIZED FOR OUR WORK IN CANCER DISPARITIES**, studying the forces causing or contributing to the disproportionate impact of cancer on certain populations.

Massey serves as a **VITAL RESOURCE FOR EDUCATION**, offering academic programs and training for cancer researchers and oncology health care professionals, as well as outreach programs for cancer patients, caregivers and the community.

Massey offers one of the **LARGEST SELECTIONS OF CANCER CLINICAL TRIALS** in Virginia for multiple cancer types. Some of these trials were developed by our scientists.

Massey is leading the nation in establishing a 21st-century model of equity for cancer research and care. We partner with, care for, reach out to and engage with our community to make scientific advancements that **EQUITABLY IMPROVE THE HEALTH OF OUR COMMUNITY**.

THE 5 C'S OF MASSEY'S CANCER CARE

COMPASSIONATE

Our medical team provides respectful, attentive and personalized care that focuses on the patient and not just the disease.

CUTTING-EDGE

We provide the most advanced therapies, technologies and clinical trials, propelled by our research and delivered by nationally recognized experts.

COMPREHENSIVE

We offer the full range of treatment options and scope of care, from screening and diagnosis to treatment and survivorship.

COLLABORATIVE

Our specialists work in teams organized by expertise in specific cancer types to offer "one-stop" consultations and coordinated care.

CUSTOMIZED

Recognizing that each patient is unique and each type of cancer is different, Massey provides tailored treatment strategies and care plans.

Massey treats all types of cancers, including complex and rare cases.

Our care by the numbers:

25,380
chemotherapy treatments

23,740
radiation treatments

2,940
surgical procedures

129
bone marrow transplants

19
CAR T-cell therapies

per year for
15,840 patients

(approximate; as of calendar year 2020)

AWARD-WINNING CANCER CARE provided by nationally ranked VCU Medical Center, a leading academic hospital part of VCU Health

Massey pioneered the region's **MULTIDISCIPLINARY APPROACH** to cancer care, bringing together the area's largest and most comprehensive, collaborative cancer teams.

Massey is Virginia's largest, longest-running and **MOST COMPREHENSIVE BONE MARROW TRANSPLANT PROVIDER**. We provide all available transplant options, including related and unrelated transplants and umbilical cord blood transplants, as well as cellular immunotherapies for adults and children. We were the **FIRST IN THE STATE TO OFFER CAR T-CELL THERAPY**.

Massey is an **INTERNATIONALLY ACCLAIMED LEADER IN PALLIATIVE CARE**. We train clinicians and administrators at hundreds of other institutions on developing and delivering supportive care to patients with chronic illness.

At least

30%

of our patients are underrepresented minorities.

Massey is further designated by the NCI as a Minority/Underserved NCI Community Oncology Research Program (MU-NCORP) institution to lead a statewide clinical trials network that fosters access to cancer research for minority and medically underserved patients.
